

Week Five: February 10, 2014 – February 18, 2014

After long shop hours and a tremendous amount of dedication, Team Driven bagged our robot, Tricerobot, Tuesday night with ten minutes to spare! This ended one of our most successful build seasons ever.

The CAD, build, and machining teams have been cranking out parts and putting finishing touches on our robot. This included spray painting all of the parts black.

The programming team has continued to check electronics and code before sending the robot off. The scouting team has also submitted their app to the Apple App Store!

The communications team has worked diligently to write the Chairman's Award essay. After lots of collaboration, they sent in a beautifully crafted essay right before the due date on February 14.

The website team has been busy updating the mentor and alumni lists. They are also considering various designs for the Cow Town Throwdown website.

On Saturday, February 15, the R-7 Alliance hosted scrimmages from 12 to 6 in the B Gym with teams from around the Kansas City Metro Area. We drew many people to the Week Zero event, and we welcomed many new faces into our shop for tours and to lend parts.

Team Driven is continuing to prepare for our regional competitions, which includes the final reveal video, Chairman's Award presentation and boards, and pit documentation. Thank you to everyone who supported Team Driven through time, resources, and/or energy. We look forward to seeing you at the Greater Kansas City Regional!

April 23 through April 26

Featured Sponsors

Sioux Chief Manufacturing Co. and Team Driven have had a great partnership. Many mentors work here, and this year we are hosting an event to honor them. Sioux Chief donated the Hurco Hawk 5M CNC that we use to mill parts. Come to the shop on February 27 at 7:00 for a ceremony thanking Sioux Chief for their kind donation.
